#### BASIC-ABSTRACT:

The road and street sign is designated and adapted to be used on a location and an intersection, the sign intended to display information for motorist. The sign comprises at least one symbol illustrating or representing traffic patterns, prescription and danger.

The position of the symbol on the sign corresponds to the adjacent location to which the symbol is referring to and the symbol on the sign represents and indicates the adjacent prescription sign, traffic and danger to which the sign is located where such symbol being positioned on the left, top, right and bottom part of the sign to indicate the respective adjacent location to which it refers to.

ADVANTAGE - Provides a vehicle traffic sign with a novel, readily visible characteristic- other than the first traffic information in the

form of wording  
on the sign - which serves to positively and quickly to locate  
an adjacent  
street corner with a stop sign, or to indicate the same to an  
approaching  
driver who also has a stop to do at the same street  
intersection.
